SMART 600

Neighborhoods, school zones, construction sites and dangerous roads could use a little help in promoting compliance with the speed limit. But we realize officers can't be everywhere at once and that's why we offer SMART, a Speed Monitoring Aware Radar Trailer that is towed to sites with speed-related problems.

We offer multiple models with displays ranging from 12 to 36 inches to meet your specific speed and traffic-lane needs.

The SMART 600 includes a directional radar and a 12-inch amber LED display with a Lexan® non-glare finish for clear, easy readability even in direct sunlight and automatic intensity adjustment to ambient light conditions.

Optional upgrades include a solar panel, over-speed blanking, tamper alarm, violator alert, traffic statistics computer, removable hitch and a trailer cover.
